Skills & Expertise

UX Design

Skilled in directing and implementing powerful human-centered experience solutions that empathize with the end user and succeed in reaching business goals while appreciating technical constraints.

Visual Design

Adept in creating interface and branding elements and systems such as design libraries, style guides, brand identities, and UI elements.

Prototyping

Skilled with industry leading prototyping software to demonstrate complex experience interactions, animations, and workflows.

User Research

Skilled in designing and moderating user research exercises, writing discussion guides, moderating research sessions, designing and directing data synthesis, and presenting findings and insights.

Front-End Development

Working knowledge and literacy of front end HTML, CSS, and Javascript from designing and coding a few Jekyll websites and working with developer partners.

Content & Experience Strategy

Skilled in developing content and experience strategies for product narratives, designing and moderating strategic cross-functional interactive workshops, and establishing strategic pillars to guide product direction.
